

MSc. Milay Cabarroi Hernandez

National Botanical Garden

Cuba

Mycology Department

•Environmental education

•Fungi-Monera-Protocista

Taxonomy,
phylogeny,
classification and
diversity of
macrofungi of Cuba

.....**FUNGI**

Field work

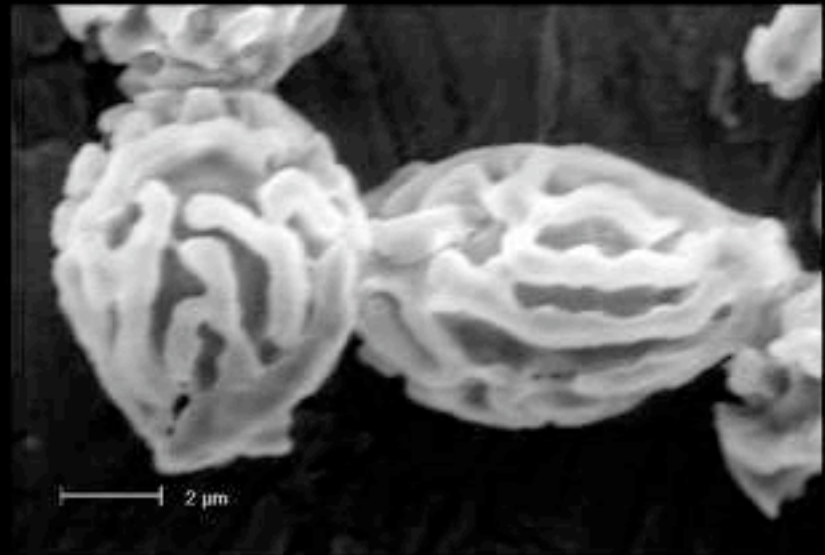

Critical laboratory analysis

Macroscopic and microscopic examination

Analysis of DNA sequence data of selected taxa

To compare morphology between macrofungi of
Cuba and other countries

Ganoderma australe

Ganoderma colossum

Recognized, reference Herbarium

Data base

GTI Training.....

Revised original materials from MUCL, not available in Cuba

To discuss molecular data of Ganodermataeae in Cuba and the Caribbean, for my Phd studies

To improve my technical skills in modern methods of taxonomy for better teaching in Cuba

Up date the Fungal collection

Ganoderma applanatum

Thank you for your attention!
