

# RBINS GTI projects

## A 10 years success story!

---

- RBINS and 2 institutions: VNMN and RUPP
- Collaboration between taxonomists working on Insects

# What is GTI?

- GTI = Global Taxonomic Initiative
- Created by the Convention on Biological Diversity
- Naming species = base of any knowledge / protection

# First step: 2007

## Visit of Mr Pham Hong Thai

---

- GTI project involving H.T. Pham and J. Constant with support of Dr P. Grootaert, Head of the Entomology Department.
- Training in Taxonomy and collection management.
- 5 visits to RBINS financed by GTI, one month each.
- Main subject: taxonomy of Cicadidae and Fulgoromorpha.

# From local to international impact

---

- First papers by H.T. Pham: faunistic lists and keys in Vietnamese, based on available literature.
- Training in genitalia dissection techniques, drawing, building of a paper for international journals – Access to literature.
- First subject: description of 2 new species of Issidae from S Vietnam.

*Hemisphaerius cattienensis* sp. nov.

# New start in 2010

## GTI project in Vietnam (RBINS-IEBR)

- Inventories of different groups of insects in protected areas.
- Training in field collecting techniques.
- Evaluation of the entomology collections.
- Guidance in insect collection management.

# GTI project in Vietnam 2010-2016

---

- 20 sampled locations all over Vietnam.
- 24 weeks of fieldwork.
- 5 symposiums in IEBR and VNMMN.

# GTI project in Vietnam

## 2010-2016 – Results

---

- 20+ papers in peer-reviewed journals.
- 14 new species of planthoppers.
- 5 new species of cicada – identification keys.
- 2 new genera and 8 new species of stick insects.

...many more to come!

*Orthophana maichiae* Constant & Pham, 2016

*Phryganistria heusii yentuensis* Bresseel & Constant, 2014

# New addition in 2016

---

New partner of the GTI project:  
Royal Phnom Penh University (Cambodia).

- Regional cooperation in SE Asia.
- Sharing knowledge and expertise in entomology.
- Promote joint fieldwork.

# Dr Pham Hong Thai...

Step by step...

---

- Researcher IEBR, dept of insect systematics.
- PhD in Taiwan.
- VNMN: Head of the Specimen Collections Management Department.
- VNMN: Director - Centre for Insect Diversity and Systematics.

# The Future

## GTI project in Vietnam

---

- Go on sampling poorly documented zones (Vietnam = Biodiversity Hotspot).
- Description of the Vietnamese entomofauna.
- Congress on Vietnamese Biodiversity management in 2017.

# The Future

## Centre for Insect Diversity and Systematics

---

- National reference collection.
- Research centre on insect taxonomy and other aspects of entomology (faunistics, biology, phenology).
- Building a digital collection of the types of Vietnamese species preserved abroad.

# GTI project in Cambodia

## ORIGIN

---

- Meeting with Mr Sophany Phauk in Brussels (2015).
- Prospective fieldwork in 2015 – Training of 5 RUPP-CEI students.
- 2 days workshop at RUPP (30+ students).
- Cambodian Entomology Initiative.

# GTI project in Cambodia

## 2016

---

- Collaboration with Vietnam National Museum of Nature.
- Field training of 4 RUPP-CEI students.
- Workshop in RUPP.

# GTI project in Cambodia

## OUTPUTS

---

- New species and new records of Fulgoromorpha.
- New species and new records of Phasmida.
- New records of Cicadidae.

# GTI project in Cambodia

## PERSPECTIVES 2017

---

- Training in Taxonomy: one month in RBINS for 2-3 students.
- Training in field work and field taxonomy for 4-5 students.
- New papers on Cambodian insects.

# Or koon! Thank you! Cam on! Dank U! Merci!

---
